

SUMMER HOLIDAY HOME WORK 2016

SCIENCE -CLASS VIII

1. Survey :Interact with about 50 people (living in different places)and find out the the type pf fibres/fabric they use for the following purposes
 - i) For shirts
 - ii) sarees/dress
 - iii) trousers/pants
 - iv) Bedsheets
 - v) furnishing material

Also the reason why that particular fabric is preferred by them.

Submit the report in a tabular form and draw pie charts to show the% of preferred fabrics for different purposes.

2. Find out about five metals obtained and produced in India. Where are these metals commonly found and their uses. Report in a tabular format.

OR

Make flash cards(20x15cm hard board or chart papers)with Name ,symbol and uses of any one metal and non metal each.

3. Discover from your surroundings any number (at least two)of Natural materials that could replace plastics that are used now for a specific purpose.(eg. leaves in place of plastic plates)

OR

Bring 5 objects that you have made reusing plastics.

4. Take photographs of some areas where pollution of water/soil is seen .Find out the causes/sources of pollution.

OR

5. Make a poster for the topic –Zero Pollution.

Parents are requested to guide and support the children in discovering new facts through their assignments and allow them to complete their tasks on their own with your presence.

All students will complete 5 tasks as required and submit reports in A4 sheets of papers.(You may use one side of used sheets if available.)
